Question 2:

Reddit User Stories:

As a user I want access to a search bar without needing to navigate to it before searching.

- Display a search bar on each page.
- Display a magnifying glass icon continually that links to search functionality.

As a user I want to save posts so that I can find them later.

- Saved post is indicated with a color fill on the saved post icon.
- Display saved posts to user profile under My Saved Posts

As a user, I need a system message indicating that there are no search results available.

- Display an error message saying no results were found.

As a user, I want to add a comment to a post so that I can engage in a discussion.

- Comment appears in post thread.

As a user, I want to follow a post so that I know when comments are added.

- Post name appears under Following tab.
- Notifications of comments are indicated by a 1 next to the notification icon.
